

Grain Temperature Monitor

www.grainhandler.com

Toll Free Number: 800-260-1745

The Grain Handler Temperature Monitoring System identifies hot spots that may cause a fire; and shuts down the dryer automatically when your user defined 'set point' temperature is reached.

Features

- Temperature sensors may be mounted anywhere in the grain columns.
- Can be monitored from your smart phone or computer if internet connection is enabled.

Our Continuous Mixed Flow Dryers Accommodate Any Type of Grain

Grain Handlers, USA Inc. is an industry leading manufacturer of Grain Dryers and Grain Handling equipment. Founded in 1986, the company leaders have decades of direct experience with farming, grain elevator operations and manufacturing.

The guiding principals of the company are to provide high quality, efficient, and economical products designed to suit the individual customer's needs.

Specifications:

Standard Sizes	Available in 8, 16 and 24 zone systems.
Power Requirements:	115 Volt AC Outlet. Additional wiring from the GH Panel may be required.
Internet Connectivity:	Hardwired Ethernet cable to modem / router and internet service provider connection is required.
Temperature Settings:	Establish your high grain temperature (set point) and the dryer will shut down automatically when it is reached.

- Benefits**
- Remote 24 x 7 monitoring of your dryer
 - Aids in preventing fires that can ruin your commodity and damage your dryer
 - Quick and easy setup with user friendly touch screen.
 - Stationary temperature sensors provide consistent measurement points and monitoring every 10 seconds.
